PROFESSIONAL SUMMARY

Adaptive MCA student skilled in Python, SQL, and Machine Learning. Experienced in building data-driven applications and predictive models using large datasets. National hackathon participant (SIH, ISRO) with a focus on scalable software and intelligent analytics.

EDUCATION

- **Master of Computer Applications (MCA):** GLS University (2024–Present) | CGPA: 7.85
- **Bachelor of Computer Applications (BCA):** Lokmanya College (2021–2024) | CGPA: 7.63

TECHNICAL SKILLS

- **Languages & Web:** Python, TypeScript, PHP, HTML5, CSS3
- **Backend & Databases:** Flask, .NET EF Core, REST APIs, PostgreSQL, MySQL
- **Data Science & Tools:** Pandas, NumPy, Scikit-learn, LightGBM, GitHub, VS Code

PROJECTS

AI-Based Crime Prediction System | *Python, Scikit-learn, LightGBM, Flask*

- Built an ML model analyzing large-scale datasets to estimate crime probability by location and time. Cleaned data with Pandas and integrated the model into a Flask API for real-time web predictions and also self trained on user input.

Event Management System | *React, TypeScript, .NET, PostgreSQL*

- Designed a full-stack platform for event registration and secure participant management.
- Implemented secure authentication and optimized database integration for efficient tracking.

Sporties E-commerce Platform | *PHP, JavaScript, MySQL*

- Built a responsive marketplace with a custom vendor dashboard and structured order processing.
- Optimized SQL queries to significantly enhance front-end page loading **performance**.

EXPERIENCE

Data Science Trainee | *QSpiders*

- Executed SQL queries to extract, validate, and analyze application data, ensuring backend database integrity and accuracy across environments.
- Gained hands-on exposure to data workflows, applied analytical techniques to identify patterns, and collaborated with developers to resolve data quality issues.

HACKATHONS

SIH 2025, ISRO Bharatiya Antariksh Hackathon, EY Techathon 6.0, Gen AI Exchange 2025 — engineered solutions, modeled space tech, built prototypes, and innovated with generative AI.
